

	<p>corners</p>	<p>Where two lines or sides of a shape meet.</p>
	<p>curved</p>	<p>This is a line that is not straight.</p>
	<p>straight</p>	<p>A line that joins two points without bending.</p>
	<p>line of symmetry</p>	<p>When one half of a shape matches the other, like a reflection.</p>
	<p>two dimensional (2D)</p>	<p>A shape that has length and width but no height. It is a flat shape.</p>
	<p>sides</p>	<p>The line between two corners of a shape.</p>

	<p>round</p>	<p>Has a shape like a circle or a ball.</p>
	<p>Curved surface</p>	<p>Any surface on a three-dimensional shape that is not flat.</p>
	<p>solid</p>	<p>If an object has 3 dimensions, it is known as a solid shape. It has no air inside.</p>
	<p>three dimensional (3D)</p>	<p>A shape that has length, breadth and height.</p>
	<p>Vertex / Vertices</p>	<p>A point where two or more points meet to make an angle.</p>
	<p>surface</p>	<p>It is its outside, or part of its outside.</p>
	<p>face</p>	<p>The surface of a 3D shape. These can be flat or curved.</p>
	<p>edge</p>	<p>Where two or more faces meet on a 3D shape.</p>

2D Shape Word Mat

circle

rectangle

triangle

oval

octagon

square

heptagon

rhombus

pentagon

hexagon

kite

3D Shapes

square-based pyramid

triangular prism

cone

cuboid

tetrahedron

cube

cylinder
