

# My Garden Map

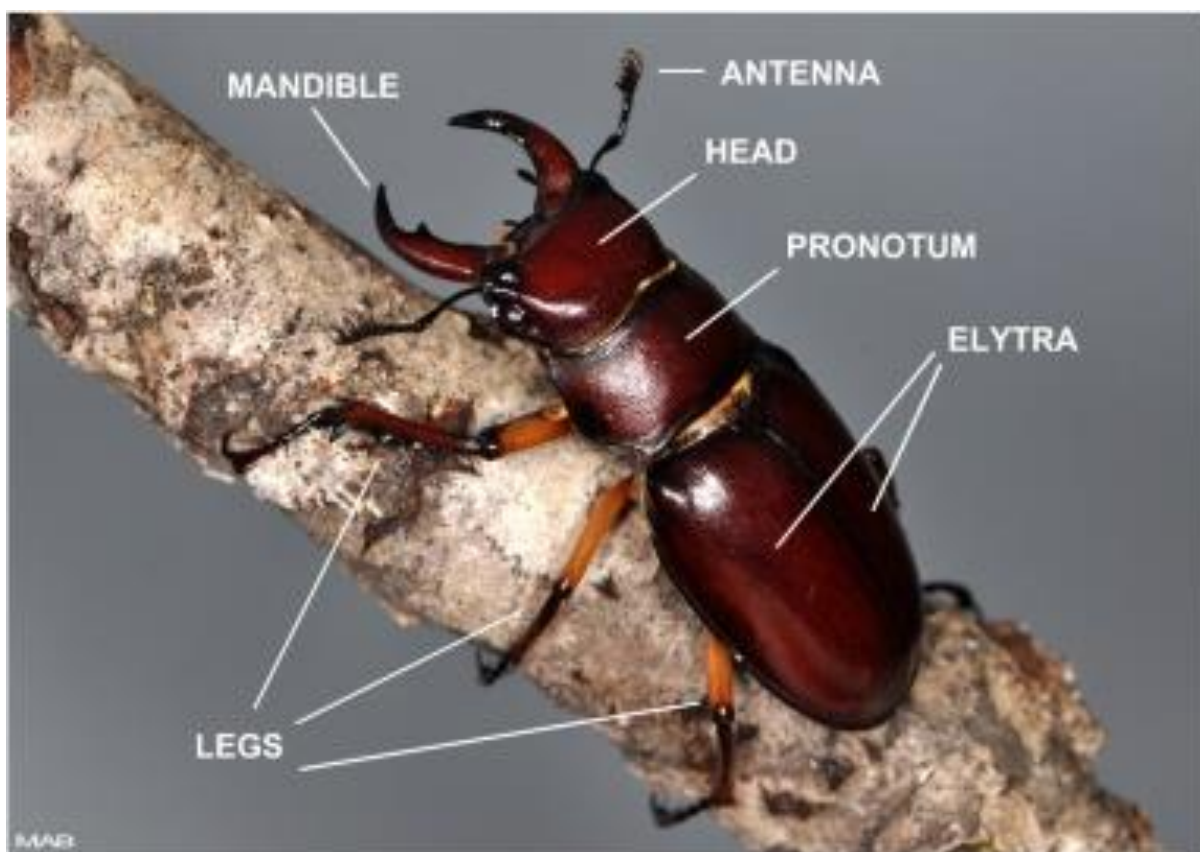

# Ideas for a simple bug home

As you can see, there are lots of ways you can make a home for a bug in your garden. You could recycle an old plastic bottle and put dry grass and sticks in. You could make a pile of bricks or stones for small animals to hide in. Make your home and then keep checking to see if any bugs or small animals have crawled in to stay safe.

# Labelling Amazing Animals

# Under the Microscope!

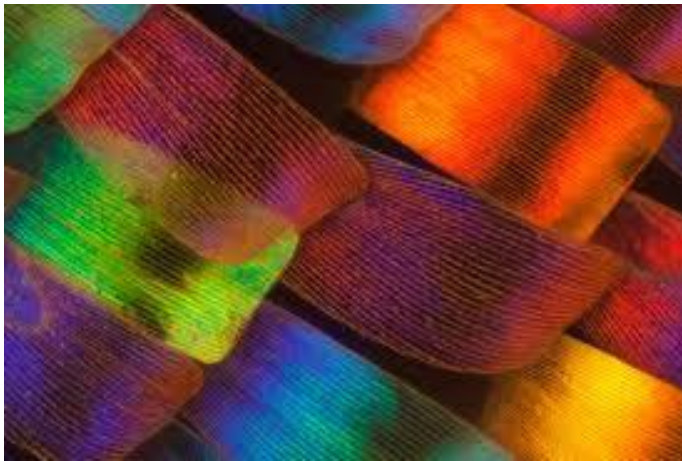

Here are some pictures of 'Fantastic Beasts' you find in your garden **BUT** they've been magnified under a microscope so you can see parts of their bodies up close. Can you tell what the animal is and what part of the body we are looking at?

spider

earthworm

butterfly wing

ladybird

snail shell
